ABOUT ME

Dedicated Flutter Mobile Application Developer and third-year Computer Technologies student with solid experience in Clean Architecture, SOLID Principles, and State Management (BLoC/Cubit). Proficient in backend integrations using Supabase, Firebase, and RESTful APIs to build high-quality, scalable, and responsive cross-platform mobile apps. Seeking a Junior or Internship Flutter Developer position to deliver high-performance applications.

EDUCATION

Damascus University | 2024 – Present (Expected Graduation: 2028)

Applied College – Computer Technologies Department, Third-Year Student

TECHNICAL SKILLS

- **Languages & Frameworks: Dart, Flutter SDK**
- **Architecture & State Management: Clean Architecture, SOLID Principles, BLoC, Cubit, MVVM, Dependency Injection**
- **Backend & Databases: Supabase (Auth, Database, Storage), RESTful APIs (Dio), Firebase**
- **AI-Augmented Engineering: Leveraging AI tools (GitHub Copilot, ChatGPT, Claude) for code refactoring, architecture**
- **optimization, and debugging.**
- **Testing & Tools: Git, GitHub, Unit & Widget Testing, Responsive & Adaptive UI Design**

PROJECTS

- **Fruits E-Commerce App:** Advanced mobile shopping application built with Clean Architecture, BLoC/Cubit, and SOLID Principles. Features complete user authentication, dynamic product catalog, and cart management powered by Supabase & Firebase integration.
- **Bookly App:** A Flutter application for browsing and searching books using public APIs. Implemented using BLoC for state management with Clean Architecture and MVVM.
- **Responsive & Adaptive Dashboard**: A cross-platform Flutter dashboard application built for Mobile, Tablet, and Desktop views. Features custom slivers, adaptive layouts (LayoutBuilder, MediaQuery), and interactive data visualization using fl_chart.

LANGUAGES

Arabic: Native

English: Good (Technical & Programming Proficiency)

ADDITIONAL INFORMATION

- **Availability**: Available for Full-Time, Part-Time, or Remote opportunities.
- **Professional Skills**: Problem-solving, Agile collaboration, Version Control Workflows (Git/GitHub).
- Fast Learner & Highly Motivated for continuous learning and code performance optimization.
